Vorex - Yu Oda
List of Special Effects

Some noteheads are reused for different effects; the intended technique is always clarified in the score.

Bass Flute & Bass Clarinet

- X notehead
  - Air sound with indicated fingering (normally no pitch, just air).
  - Exaggerated inhale/exhale: audible but not overdone.
- Triangle notehead
  - Slap tongue.
  - Foot stamp (heel or toe): audible but subtle.
- Square notehead
  - Multiphonic, with the indicated pitch as the “main” tone.
- Wave sign
  - Wide vibrato (especially suited to bass flute).
  - Bisbigliando (flute only; use available fingerings, which I hope there are).
- Dashed slur
  - Notes should be played as continuously as possible, with minimal gaps. Choose discreet breathing points.

Vibraphone (with vibraslap indicated as “slap” on the score)

- X notehead
  - Bowing: scratchy, airy sound with minimal pitch.
  - Deadstroke (mallets): dry, percussive sound.
  - White noise imitation: produce *shhh* sound with the mouth.
  - Exaggerated inhale/exhale: audible but not overdone.
- No notehead
  - Body hit (mallets): strike the vibraphone frame where convenient and resonant.
- Big X notehead
  - Strike vibraslap with a mallet.

Viola and Double Bass

- Big Dashed & Diamond notehead
  - Bow the body of the instrument to produce an airy sound.
  - Col legno tratto sul tasto pos, for airy effect.
- X notehead
  - Muted pizzicato: dampen the string to reduce pitch content.
  - White noise imitation: produce *shhh* sound with the mouth.
  - Exaggerated inhale/exhale: audible but not overdone.
- Diamond notehead
  - Col legno battuto. Black diamond = with pitch / White diamond = muted sound.

- Square notehead
    - Exaggerated bow pressure to create distorted/noisy sounds.
- No notehead
    - Sliding harmonics (“seagull effect”).
- Triangle notehead
    - Body tap: tap the instrument body with fingertip.
    - Foot stamp (heel or toe): audible but subtle.
- Dashed slur
    - Notes should be played as continuously as possible, with minimal gaps. Choose discreet spots for bow changes.

Copyright and Use

This score is provided free of charge for study and performance. By downloading or using this score, the following conditions apply:

Attribution: The composer must be credited in all performances, recordings, programs, and related materials.

Performance Reporting: All public performances must be reported to the appropriate performing rights organization (PRO) responsible for collecting performance royalties. This work is registered with Buma/Stemra.

Composer Notification: Performers and organizers are additionally requested to notify the composer directly of performances using the contact information below.

No Redistribution: Redistribution of this score, its parts, or any modified versions is not permitted without written permission from the composer.

Derivative Works: Arrangements, orchestrations, adaptations, or other derivative works may not be created without explicit written permission from the composer.

Artificial Intelligence and Machine Learning Restriction: This musical work, score, and all associated materials may not be used for training, fine-tuning, dataset creation, or any development of artificial intelligence or machine learning systems without explicit written permission from the composer.

Permitted Use: The score may be downloaded, studied, rehearsed, and performed under the conditions listed above.
